RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Jon Brown

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

It's ridiculous that carriers would get involved on any level with the communications sent over their network. Phone companies don't block callers who swear.. and I expect the same for any other pipe: telephones, digital phone communications, internet, etc.

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Lacey Kammerer

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Dale Riehart

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I am very perturbed that *any* communication medium in this day and age is subject to gatekeeping by our service providers, the people we pay to provide us our link to one another. They have no place on deciding the quality or validity of that link, or what travels across it.

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Beverly Williams

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

John Murvine

I find it particularly disturbing that as a T-mobile client, when I requested T-Mobile to please block the texts from the dangerous predator who assaulted a family member and was continually stalking and harassing all family members via T-Mobile text service, T-Mobile refused any such blocking service.

So it is OK for T

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Phoury Chhun

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Benjamin Stokes

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I invite you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like. Censoring and filtering of text messages is what they do in countries like China, and this is the United States, and it was once thought of as a "free country," so where do the US agencies stand on this?? Are you really going to let some big telecom companies push you around and make a mockery of the US Constitution?? I

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Chet Hepburn

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Christina Williams

As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Sara Schmidt

RE: Comment in: GN Docket No. 08-7

Dear Chairman Genachowski,

I urge you to finally grant Public Knowledge's petition and make it clear to wireless carriers that they cannot censor text messages they don't like.

Text messaging is a vital form of communication, and should be protected from interference just like voice calls. We do not allow phone companies to decide who makes a phone call and what they can say. It is time to stop letting cell phone companies decide who can send a text message and what it can say. As long as the threat of unjust and unreasonable text message blocking lingers, companies and nonprofits will avoid spending time and money developing innovative uses for it.

There is no reason why wireless carriers should be the gatekeepers for text message innovation. It has been three years since this problem was brought to the FCC's attention, and yet T-Mobile is still able to block text messages at whim. The FCC must grant Public Knowledge's petition now, before wireless carriers censor anything else.

Sincerely,

Judy Blaisdell
